

What is Claimed is:

1. A breast prosthesis and bust cup system adapted to be worn by a wearer comprising:

5 a breast prosthesis having a front surface and a rear surface, said rear surface being positionable adjacent to a wearer's body;

hook material positioned on said front surface; and

a bust cup including loop material engagable with said hook material, wherein said breast prosthesis is receivable in said bust cup.

10 2. The breast prosthesis and bust cup system of claim 1 wherein said hook material comprises two strips of hook material positioned along a periphery of the breast prosthesis.

15 3. The breast prosthesis and bust cup system of claim 2 wherein each of said strips has a length greater than its width.

20 4. The breast prosthesis and bust cup system of claim 2 wherein said loop material comprises two strips of loop material positioned along a periphery of the bust cup.

5. The breast prosthesis and bust cup system of claim 4 wherein each of said strips has a length greater than its width.

25 6. The breast prosthesis and bust cup system of claim 1 wherein said rear surface of said breast prosthesis includes rear hook material.

30 7. The breast prosthesis and bust cup system of claim 6 wherein said rear hook material comprises two strips of hook material positioned along a periphery of the breast prosthesis.

8. The breast prosthesis and bust cup system of claim 7 wherein each of said strips of rear hook material has a length greater than its width.

9. The breast prosthesis and bust cup system of claim 6 further comprising a comfort pad attached to said rear surface through said rear hook material.

5

10. A breast prosthesis adapted for use by a wearer comprising:
a front surface and a rear surface, said rear surface being positionably adjacent to a wearer's body;

hook material positioned on said front surface;

10

rear hook material positioned on said rear surface; and

a comfort pad removably attached to said rear surface through said rear hook material.

11. The breast prosthesis of claim 10 wherein said hook material comprises two strips of hook material positioned along a periphery of the breast prosthesis.

15

12. The breast prosthesis of claim 11 wherein each of said strips has a length greater than its width.

20

13. The breast prosthesis of claim 10 wherein said rear hook material comprises two strips of hook material positioned along a periphery of the breast prosthesis.

25

14. The breast prosthesis of claim 13 wherein each of said strips of rear hook material has a length greater than its width.
